SUMMARY

Full Stack AI Engineer with 11+ years of experience across enterprise SaaS, AI agents, and automation — 20+ projects in 6 industries. Former Technical Lead at Tata Consultancy Services, now building products end to end as an independent engineer: requirement analysis, estimation, architecture, development, deployment, and production support. Ships with Next.js, React, Node.js, TypeScript, PostgreSQL, Stripe, and LLM integrations (Claude, OpenAI).

SKILLS

Frontend: Next.js, React, TypeScript, JavaScript (ES6+), Redux Toolkit, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, GraphQL, PHP, CodeIgniter

Databases & Cloud: PostgreSQL, MySQL, MongoDB, Redis, Supabase, AWS, Vercel

AI & LLM: Claude API, OpenAI GPT, AI agent workflows, prompt engineering, Model Context Protocol (MCP), Vercel AI SDK

Tools & DevOps: Docker, Git, GitHub, Playwright, Jira, Azure DevOps, Agile/Scrum

EXPERIENCE

Freelance Full Stack AI Engineer — Independent (Fiverr & direct clients) **Oct 2025 – Present**

- Design, build, and run SaaS products end to end for clients — requirement analysis, estimation, architecture, development, deployment, and production support (see Projects: Mokoboko, AI Recruiter, Vuuka Booking Widget).
- Daily AI-assisted workflow — Claude, agent pipelines, and MCP tooling — shipping LLM-powered product features to production.
- Maintain a 5-star client review record across Fiverr deliveries.

Technical Lead — Tata Consultancy Services **Jun 2022 – Sep 2025**

- Led React UI development for an enterprise life-sciences platform in an Agile model — owned requirement analysis, estimation, and delivery for the team.
- Managed the end-to-end deployment process, keeping releases smooth and error-free; supported the production environment and handled incidents.
- Ran internal team sessions to unblock engineers, clarify requirements, and keep task progress on track.

Sr. Software Engineer — NeoSOFT Technologies **Jul 2020 – Jun 2022**

- Built React applications across life-insurance, communication, and e-learning domains in Agile teams.
- Worked directly with clients to gather requirements, give technical direction, and turn feedback into precise estimations.
- Led the interview process and fed structured feedback into the company's hiring pipeline.

Sr. Software Engineer — Tops Infosolutions Pvt Ltd **Dec 2015 – Jul 2020**

- Delivered frontend and backend features across e-commerce, SaaS CRM (multi-level marketing), and event-booking products (React, PHP, MySQL).
- Partnered with QA end to end — from reproducing bugs to shipping the fix.

PHP Developer — Parex Technologies **Oct 2014 – Aug 2015**

- Developed new product features and supported existing ones — core PHP product development fundamentals.

PROJECTS

Mokoboko (mokoboko.xyz) — multi-tenant class and subscription booking SaaS, live in production for fitness studios in Portugal: Express.js + Sequelize + PostgreSQL API, Next.js admin dashboard, customer storefront, Stripe billing for classes, packs, subscriptions and discount codes, transactional email/SMS queues, Nylas calendar sync.

AI Recruiter (ongoing) — multi-tenant AI recruiting SaaS: supervised multi-agent workflows for resume extraction, screening scorecards, outreach drafts, and chat + voice interviews — Next.js 15 + Supabase with Claude-powered agents, Stripe subscriptions metered by per-run credits, Postgres-backed workers streaming progress in real time.

Vuuka Booking Widget — per-venue booking front end for a US nightlife platform: event tickets, table reservations, venue rentals, and memberships through a multi-step Stripe checkout with phone-OTP login, promoter attribution, and a QR-entry customer wallet (React, Redux, Stripe).

Jubzi Food Ordering — commission-free multi-restaurant ordering platform for Windsor, Canada: customer storefront, restaurant console with full order lifecycle, and platform admin with master catalogs (React, Node.js, Express.js, MongoDB, Docker).

BathOne — multi-marketplace commerce back office for a home & garden retailer: one product synced to Amazon, eBay, Walmart, Houzz and more, with central inventory, SKU merge, and cron-driven order management (CodeIgniter, PHP, MySQL, REST APIs).

Earlier work — WhiteHat Jr product (React, Next.js), insurance regulator portal (React, Laravel), e-learning system (React, Node.js), event booking (React, Java), 360F advisory platform (React).

EDUCATION

Bachelor of Computer Engineering — Gandhinagar Institute of Technology, 2014

Post Graduate Diploma, International Business Operations — Indira Gandhi National Open University, 2020
